QUARTERLY REDEMPTION CALENDAR

The ARK Venture Fund (the “Fund”) is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end, management investment company that is operated as an interval fund. Subject to applicable law and in accordance with the terms of prospectus, the Fund will conduct quarterly repurchase offers for up to 5% of the Fund’s outstanding Shares at NAV. Even though the Fund will make quarterly repurchase offers, investors should consider the Fund’s Shares to be illiquid.

For the calendar year 2023, the Fund will make quarterly repurchase offers on the following dates:

• March 31, 2023
• June 30, 2023
• September 29, 2023
• December 29, 2023

Shareholders will receive notification of each Repurchase Request Deadline with instructions on how to submit a repurchase request no less than 21 days and no more than 42 days in advance of that Repurchase Deadline.
Disclosures

You should not expect to be able to sell your Shares other than through the Fund’s repurchase policy, regardless of how the Fund performs. The Fund’s Shares will not be listed on any securities exchange, and the Fund does not expect a secondary market in the Shares to develop. Shares may be transferred or sold only in accordance with the Fund’s prospectus. Although the Fund will offer to repurchase Shares on a quarterly basis, Shares are not redeemable and there is no guarantee that shareholders will be able to sell all of their tendered Shares during a quarterly repurchase offer. An investment in the Fund’s Shares is not suitable for investors that require liquidity, other than liquidity provided through the Fund’s repurchase policy. The ARK Venture Fund is a continuously-offered, non-diversified, registered closed-end fund with limited liquidity.

All statements made regarding investment opportunities are strictly beliefs and points of view held by ARK and investors should determine for themselves whether a particular investment or service is suitable for their investment needs. Certain statements contained in this document may be statements of future expectations and other forward-looking statements that are based on ARK’s current views and assumptions, and involve known and unknown risks and uncertainties that could cause actual results, performance or events to differ materially from those expressed or implied in such statements. The matters discussed in this document may also involve risks and uncertainties described from time to time in ARK’s filings with the U.S. Securities and Exchange Commission. ARK assumes no obligation to update any forward-looking information contained in this presentation. Past performance is not a guarantee of future results.

Investors should carefully consider the investment objectives and risks as well as charges and expenses of the ARK Venture Fund before investing. This and other information are contained in the ARK Venture Fund’s prospectus, which may be obtained by visiting www.ark-ventures.com. The prospectus should be read carefully before investing.

An investment in the ARK Venture Fund is subject to risks and you can lose money on your investment in the ARK Venture Fund. There can be no assurance that the ARK Venture Fund will achieve its investment objectives. The ARK Venture Fund’s portfolio is more volatile than broad market averages. The ARK Venture Fund also has specific risks, which are described below. More detailed information regarding these risks can be found in the ARK Venture Fund’s prospectus.

The principal risks of investing in the ARK Venture Fund include: Equity Securities Risk. The value of the equity securities the ARK Venture Fund holds may fall due to general market and economic conditions. Foreign Securities Risk. Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. Disruptive Innovation Risk. Companies that ARK believes are capitalizing on disruptive innovation and developing technologies to displace older technologies or create new markets may not in fact do so. Companies that initially develop a novel technology may not be able to capitalize on the technology. Companies that develop disruptive technologies may face political or legal attacks from competitors, industry groups or local and national governments. These companies may also be exposed to risks applicable to sectors other than the disruptive innovation theme for which they are chosen, and the securities issued by these companies may underperform the securities of other companies that are primarily focused on a particular theme. Information Technology Sector Risk. Information technology companies face intense competition, both domestically and internationally, which may have an adverse effect on profit margins. Financial Technology Risk. Companies that are developing financial technologies that seek to disrupt or displace established financial institutions generally face competition from much larger and more established firms. Fintech Innovation Companies may not be able to capitalize on their disruptive technologies if they face political and/or legal attacks from competitors, industry groups or local and national governments. A Fintech Innovation Company may not currently derive any revenue, and there is no assurance that such company will derive any revenue from innovative technologies in the future. Cryptocurrency Risk. Cryptocurrencies (also
referred to as "virtual currencies" and "digital currencies") are digital assets designed to act as a medium of exchange. Cryptocurrency is an emerging asset class. There are thousands of cryptocurrencies, the most well-known of which is bitcoin. The Fund may have exposure to cryptocurrencies, such as bitcoin indirectly through an investment in the Bitcoin Investment Trust ("GBTC"), a privately offered, open-end investment vehicle that invests in bitcoin. **Leverage Risk.** The use of leverage can create risks. Leverage can increase market exposure, increase volatility in the Fund, magnify investment risks, and cause losses to be realized more quickly. **New Fund Risk.** There can be no assurance that the Fund will grow to or maintain an economically viable size, in which case the Board may determine to liquidate the Fund if it determines that liquidation is in the best interest of shareholders. **Non-Diversification Risk.** The Fund is classified as a "non-diversified" investment company under the 1940 Act. Therefore, the Fund may invest a relatively higher percentage of its assets in a relatively smaller number of issuers or may invest a larger proportion of its assets in a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund’s NAV and may make the Fund more volatile than more diversified funds. **Communications Sector Risk.** The Fund will be more affected by the performance of the communications sector than a fund with less exposure to such sector. **Cyber Security Risk.** As the use of Internet technology has become more prevalent in the course of business, funds have become more susceptible to potential operational risks through breaches in cyber security. **Future Expected Genomic Business Risk.** The Adviser may invest some of the Fund’s assets in Genomics Revolution Companies that do not currently derive a substantial portion of their current revenues from genomic-focused businesses and there is no assurance that any company will do so in the future, which may adversely affect the ability of the Fund to achieve its investment objective. **Privately Held Company Risk.** The strategy invests in privately held companies. Investments in privately held companies involve a number of significant risks, including the following: these companies may have limited financial resources and may be unable to meet their obligations, which may be accompanied by a deterioration in the value of any collateral; they typically have shorter operating histories, narrower product lines and smaller market shares than larger businesses, which tend to render them more vulnerable to competitors’ actions and market conditions, as well as general economic downturns; they typically depend on the management talents and efforts of a small group of persons; there is generally little public information about these companies and these companies and their financial information are not subject to the Securities Exchange Act and other regulations that govern public companies, and there may be an inability to uncover all material information about these companies; they generally have less predictable operating results and may require substantial additional capital to support their operations, finance expansion or maintain their competitive position; changes in laws and regulations, as well as their interpretations, may adversely affect their business, financial structure or prospects; and, they may have difficulty accessing the capital markets to meet future capital needs.
