The Exchange Traded Funds (“ETFs”) held in the Automated Strategies may hold individual equity or bond securities corresponding with the strategy. ETFs are subject to market risk, including the possible loss of principal. The value of the portfolio will fluctuate with the value of the underlying securities. ETFs may trade for less than their net asset value. The price of equity securities may rise or fall due to the changes in the broad market or changes in a company's financial condition, sometimes rapidly or unpredictably. Equity securities are subject to "stock market risk" meaning that stock prices in general may decline over short or extended periods of time. Bonds are subject to interest rate risk, credit, and default risk of the issuer. Bond prices generally fall when interest rates rise.

Any historical returns, expected returns, or probability projections are purely hypothetical in nature and may not reflect actual or potential future performance. All performance data is strictly illustrative in nature, represents best estimates based on available data, and may differ from actual results.

Any performance results represent performance of a hypothetical account invested in Automated Stocks or Automated Bonds (collectively, the “Automated Strategies”) since 1/1/2015. The Inception Date for the Automated Strategies is 2/3/2023, which is the date that the Automated Strategies launched on Titan’s platform. Automated Strategies are comprised of equity or bond ETFs. Performance results for Automated Strategies prior to the Inception Date (but excluding 2/1/2023 and 2/2/2023) are generated using data from Bloomberg as a proxy by using returns of the individual ETFs that comprise the Automated Strategies, with varying weights consistent with the methodology applied to the Automated Strategies. If a proxy ETF is unavailable, the ETF returns are estimated using the returns of the corresponding index and subtracting the ETF expense ratio. Titan does not charge advisory fees for Automated Strategies. All price and return data are from Bloomberg. Annualized Historical Return measures the annualized return of investments from 1/1/2015. The holdings and weights for Automated Bonds may differ between taxable and retirement accounts. Performance results do not take into account data from 2/1/2023 or 2/2/2023.

Any performance results have been prepared exclusively by Titan, and have not been compiled, reviewed, or audited by an independent accountant. Performance estimates are subject to future adjustment and revision. Investors should be aware that a loss of investment principle is possible. Account holdings and related information are for illustrative purposes only and are not to be considered investment recommendations. Additional information, including Titan’s calculation methodologies and a full list showing the contribution of each holding to the strategy’s performance during the time period will be provided upon request.
